### WORK EXPERIENCE

- **KPMG Luxembourg** Kirchberg, Luxembourg  
*Network and Security Engineer* May 2026 - Oct 2026
  - Improved and secured on-premises network infrastructure, and managed privileged access on network devices (Cisco, Idira).
- **Bouygues Telecom** Meudon, France  
*Software Engineer* Sep 2023 - Apr 2026
  - Designed, developed, tested, and deployed applications in production, in close collaboration with stakeholders to meet functional and technical requirements (Figma, ServiceNow, PowerApps Canvas).
- **Eurofins Biomnis** Ivry-sur-Seine, France  
*Assistant Project Manager* Apr 2022 - Jun 2022
  - Optimized temperature management for 300 sensors by assisting installation, training, validation, and system transition in a medical lab (Oceasoftware).

### PROJECTS

- **Home Lab - Self-Hosted Infrastructure:** Designed and deployed a self-hosted infrastructure on Proxmox, segmented into dedicated VMs for reverse proxy/VPN gateway, containerized services (cloud storage, media, automation), backups, and monitoring.  
**Technologies:** Proxmox, ZFS, Docker, Kubernetes, Nginx/Traefik, WireGuard, Fail2Ban, Nextcloud, Jellyfin, PostgreSQL, Redis, MongoDB, Restic, Duplicati, NFS/SMB, Prometheus, Grafana, Cloudflare Tunnel
- **Last Project - Prolival (Tenexa):** Developed a multi-provider cloud management platform (AWS, GCP & Horizon) enabling provisioning and lifecycle management of VMs, Kubernetes clusters, storage volumes, and backup plans, with event-driven workflow orchestration and real-time resource monitoring.  
**Technologies:** Java, Spring Boot, RabbitMQ, Python, Apache Airflow, Keycloak, Vault, Docker Compose, GitLab CI/CD
- **Network Programming - Chat Stream:** Designed a real-time client-server messaging application implementing the TCP/UDP protocols from scratch, supporting public chat, private messaging, and direct peer-to-peer file transfers with optional password authentication, alongside a custom RFC defining the client-server communication protocol.  
**Technologies:** Java, Concurrency, Blocking/Non-blocking I/O, Git, TCP, UDP, RFC Design
- **Large Language Model - Class Gen:** Built a full-stack tool leveraging a locally-run LLM to generate, compile, and automatically fix Java classes from natural language prompts, ensuring full data confidentiality with no external API calls, and orchestrating model interactions via Langchain4J.  
**Technologies:** Java, Spring Boot, H2, Svelte, Bootstrap, Langchain4J, Jackson, OpenAPI

### EDUCATION

- **ESIEE Paris - Université Gustave Eiffel** Noisy-le-Grand, France  
*Master's degree in Computer Science: Cybersecurity, Network and Software Development* Oct 2023 - Sep 2026
- **ENSGSI - INP Group** Nancy, France  
*Bachelor's degree in Engineering Sciences: Multidisciplinary Education* Sep 2022 - Jun 2023
- **Université Paris-Est Créteil (UPEC)** Créteil, France  
*University Technical Diploma - Physical Measurements* Sep 2020 - Jun 2022

### SKILLS

- **Cybersecurity:** Network Security (Firewall, Proxy, NAT, VPN, TOR), Identity & Access Management (AAA, RADIUS, EAP, LDAP, Active Directory, Keycloak), Security Protocols (TLS, SSH, OAuth2, JWT), Web Security (OWASP Top 10), Vulnerability Management (CVE, CWE, Bandit, Gitleaks, pip-audit, Trivy)
- **Network:** OSI, TCP/IP, DNS, HTTP, IPv4, IPv6, DHCP, ARP, ICMP, TCP, UDP, QUIC, VLAN, STP, RIP v2, EIGRP, OSPF, MPLS, VPC, Nginx
- **Programming Languages:** Python, Bash, Java, C, Kotlin, HTML, CSS, JavaScript, TypeScript, SQL
- **Frameworks:** Spring Boot, JEE, React, Svelte, Next.js, Bootstrap, Langchain 4J, FastAPI, SQLAlchemy, Pydantic
- **Tools:** Docker, Docker Compose, Kafka, RabbitMQ, Airflow, Maven, JUnit, pytest, Jackson, Git, GitHub Actions, GitLab CI/CD, Postman, OpenAPI, Grafana, Prometheus, Solarwinds, Vault, Burp Suite, Copilot, Cisco ISE, Cisco Packet Tracer, Ansible
- **Soft Skills:** Adaptability, Teamwork, Communication, Autonomous

### LANGUAGES

- **French:** Fluent
- **English:** Professional
- **Vietnamese:** Fluent
